FAQ's

Q: How long does it take to get Insta-mold earplugs made?

A: 10 minutes in the chair to make the Earmolds & approximately 30 minutes to finish the earplugs ready for use.

Q: How long should the earplugs last?

A: 2-5 year's dependant on use & care of the earplugs.

Q: How do you clean the earplugs?

A: We recommend cleaning the earplugs in warm soapy water when required.

Q: Are the earplugs rated?

A: Yes. Our Earmolds hold a true Class 5 rating complying to the Australian standards with up to 40.5dB reduction at 4000htz

Q: Are the earplugs comfortable?

A: Yes, we pride our earplugs on being a comfortable fit. If you find they aren't 100% comfortable we are more than happy to adjust your earplugs to better suit you.

Q: Can I have different colours?

A: You sure can! You can have a different colour in each ear or mix 2 colours together to create a marble or spiral effect.

Q: Can I retro-fit electronics to my pre-existing earmolds?

A: Yes in most cases, depending on the electronics & conditions of earmolds.

Q: What can they be used for?

A: Our earplugs are suitable for motorbike riding, industry work, sleeping, shooting, swimming, security work, water sports, recreational use & in an aeroplane

Q: What is the difference between Insta-mold earplugs & the LabFlex range?

A:

LabFlex	Insta-mold
- Made via an impression of your ear, ready in 7-10 business days	- Made on the spot direct from your ear with instant material
- Heat cured silicone is used	- Air cured silicone is used
- Holds a 4 year warranty	- Holds a 2 year warranty
- Shore rating of 25, 40 or 60	- Shore rating of 35
- Decibel reduction in a 4000htz environment is 36.2	- Decibel reduction in a 4000htz environment is 40.5

Q: Where can I get these made?

A: Visit our website to see a list of our agents locations or give us a call!

We run our own in house lab and make all custom Earmolds ourselves. We take the impressions, we cast the moulds, we finish the Earmolds, we do it all ourselves, in house.
